❖ EXPERIENCE

➤ Mobile Application Developer

Twepple Technologies | [website](#)

(Apr 2025 – Present)

- Developed Flutter mobile apps with reusable components and clean architecture.
- Implemented an **internal advertisement system** enabling cross-promotion of company apps.
- Built a **Balloon Pop learning game** for kids with animations, sounds, and interactive gameplay.
- Worked with JSON-driven dynamic content and UI updates.

❖ EDUCATION

• Master of Computer Applications | School of Computer Science & IT, DAVV, Indore

CGPA : 7.92

(2023 – 2025)

• Bachelor of Computer Applications | Medi-Caps University, Indore

CGPA : 8.18

(2020 – 2023)

❖ PROJECTS

➤ Balloon Pop Game – [PlayStore](#) & [AppStore](#) | Flutter

- **Interactive Learning Game (Play Store & App Store)** - Developed and deployed a Balloon Pop learning game for kids using Flutter, featuring colorful animations, sound effects, and touch-based interactions to make learning engaging and fun.
- **Game Logic & Performance** – Implemented balloon spawning, pop detection, learning progression, and smooth animations with efficient state management to ensure responsive performance across Android devices.

➤ Twitter Clone - [Application](#) | Flutter, Firebase

- **Full-Featured Social Media App** – Built a Twitter-like mobile application using Flutter with **Provider for state management** and **Firebase Authentication & Cloud Firestore**, supporting tweet creation, likes, comments, follow/unfollow, user search, and real-time data updates.
- **User Experience & Safety Features** – Implemented **light and dark themes**, profile interactions, and moderation features including **block and report users/tweets**, ensuring a scalable, secure, and user-friendly experience.

➤ Food Delivery App - [Application](#) | Flutter, Firebase

- **End-to-End Food Delivery Application** – Developed a Flutter-based food delivery app using **Provider for state management** and **Firebase Authentication & Cloud Firestore**, enabling user login, restaurant/menu browsing, item selection with **add-ons**, and real-time cart management.
- **UI, Themes & Payments** – Implemented **light and dark mode**, dynamic cart pricing, and **payment integration**, ensuring a smooth, responsive, and user-friendly ordering experience.

❖ SKILLS

- | | |
|------------------------|--|
| • Programming Language | : Core Java, Dart, Kotlin, Python |
| • Framework | : Flutter |
| • Cloud | : Firebase, Supabase |
| • Databases | : MySQL, MongoDB |
| • Development Tools | : VS Code, IntelliJ Idea, Android Studio, Github |

❖ CERTIFICATIONS

- Flutter MasterClass – Udemy
- Accenture Nordics (Software Engineering Job Simulation) – The Forage
